

MRS. ALICE GRESHAM DODD,
mother of the first American
soldier killed in France, who gives
credit for recovery of her
health to the well-known medicine
Tanlac.

The following remarkable endorsement of Tanlac was given recently by Mrs. Alice Gresham Dodd, at the Gresham Memorial Home, Gavin Park, Evansville, Ind., which home was presented to her by the patriotic people of Indiana, as evidence of their appreciation of the services rendered to his country by her son, Corporal James R. Gresham, the first American soldier killed in France. Expressions of sympathy were received by Mrs. Dodd from all parts of the United States, and the newspapers of the country carried the story of the first "war mother."

The shock of her son's death resulted in the serious breakdown of Mrs. Dodd's health, but everyone will learn with interest and pleasure that she is now in splendid health again. When seen at her home recently she made the following statement, giving the entire credit for her recovery to the well-known medicine, Tanlac.

"After my dear boy's death I had a general breakdown in health," said Mrs. Dodd. "At first it was just indigestion. My food used to upset me and I had to diet myself very carefully, which wasn't much hardship, as I lost all desire to eat. Then I had an attack of rheumatism, with severe pains in my shoulders, back and arms. Sometimes I used to suffer a great deal, and my joints would get all swollen up and stiff. I was able to do very little about the house, and at times couldn't even cook a meal. I got very nervous and restless, and at night would lay awake for hours, and lost many a night's sleep as a consequence."

"A friend of mine had received a great deal of help from Tanlac, and it was she who advised me to try it. I am so glad I did for it proved the best medicine I have ever taken. It soon gave me a good appetite and seemed to settle my stomach so that I was no longer troubled with indigestion. I don't know what it is to have rheumatic pains now, the swelling and stiffness has all gone out of my joints and I am able to do the work of the house with the greatest ease. My nerves are now steady and strong. I sleep fine at night, and I feel better in health than ever before in my life. I shall always be grateful for what Tanlac has done for me, and shall recommend it every chance I get."

Tanlac is sold by leading druggists everywhere.—Adv.

No Picnic.

"Yes, we were shipwrecked."
"Had to undergo some hardships. I suppose?"
"Some. There was no summer hotel handy."

WOMEN! USE "DIAMOND DYES"

Bye Old Skirts, Dresses, Waists, Coats, Stockings, Draperies—Everything.

Each package of "Diamond Dyes" contains easy directions for dyeing any article of wool, silk, cotton, linen, or mixed goods. Beware! Poor dye streaks, spots, fades, and ruins material by giving it a "dye-die." Buy "Diamond Dyes" only. Druggist has Color Card.—Adv.

Appropriate Peril.

"We had a narrow escape when we turned suddenly on that narrow path along the cliff they call the Razor."
"Yes, it must have been a close shave."

Catarhal Deafness Cannot Be Cured
by local applications, as they cannot reach the diseased portion of the ear. Catarrhal Deafness requires constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and restoring normal conditions. Circulars free. All Druggists. F. J. Chesey & Co., Toledo, Ohio.

SUPERB COATS FOR THE SPRING

THIS spring has a right to be proud of its coats, for they appear to have reached the apex of beauty. To begin with, lovely pile fabrics, with their velvety surfaces, are retained, and colors are at their richest and best in these soft materials. Some of them are best described as "luscious." Dyers and weavers work in harmony to make these superb clothes and have several seasons' experience behind them. As to outline, the styles may be broadly described as "wrappy" and ripply, resembling mantles and capes. Even in strictly utility coats lines are flowing, as may be gathered from the model shown at the right of the two pictured here. There are many sleeveless coats with deep capes, and the new models emphasize that women admire vague, graceful lines that drape

the figure, more than any other character.

There are some smooth cloths among new arrivals that are effectively trimmed with bands of patent leather. The combination is particularly good in beige or gray with black, and such coats are available for almost any sort of wear. Pile fabric coats are lined with very light weight soft silks that do not detract from their suppleness.

The handsome garment at the left of the two coats pictured, is a fair example of the mode. It is made of a cloth resembling bolivia, in the deepest and richest of purples, with gray embroidery and gray silk lining. The drapery is so managed as to make a cape at the back. Collars are less ample than they have been and in some models they become short ties or scarfs in which one end slips through a slot in the other.

Ribbon Harmonies

TWO-TONED satin ribbons, aided and abetted by narrower metallic ribbons, make such irresistible girdles as that which lends off in the array of lovely dress accessories which is pictured here. These two-toned ribbons provide many lovely color harmonies to begin with, and these are enhanced by metallic weaves that add the required gleam to the cheerful and lively modes of the coming spring and summer. However bright they are they "have a grace in being gay" and are far from garish. A girdle is rarely a simple affair in these days; it is usually ingeniously made, as revealed by the model pictured, where the ribbon is folded and finished with two frills at the top. Little metallic roses made of ribbon with buds and petals, are set along the length of the girdle and a large rosette, with many hanging loops and long ends, finished with metallic roses, makes a generous touch to a bit of

finery which will delight any woman. Below the girdle a boudoir cap of lace and ribbon employs wide and narrow numbers in light colors and is bordered with a double frill—one of plaited ribbon and one of narrow lace. Little chiffon roses joined by the tiniest of foliage, make a wreath for it. Just above are two pairs of garters in which satin ribbon is shirred over flat elastic. One pair has rosettes of very narrow ribbon shirred over thread wire and the other rosettes of a wider satin ribbon.

Four bags, in as many good designs, present new ideas in the most popular of all ribbon dress accessories. Each of them employs two kinds of ribbon and a metal mounting, but two of them have handles.

FARM STOCK

HOG-CHOLERA LOSS REDUCED

Estimated Saving of \$6,000 to Farmers of Alabama County Brought About by County Agent.

Losses by hog cholera have been materially reduced in Bullock county, Alabama, as a result of the work of the county agent in training farmers in various centers throughout the county to use the serum and apparatus developed by the United States Department of Agriculture. Forty-nine cars of

Vaccinating a Hog for Cholera—Don't Run Risks or Waste Feed With Unhealthy Live Stock.

hogs, 3,928 head, have been marketed from the county through co-operative work, with an estimated saving of \$6,000. In Houston county the department's representative taught 18 men to vaccinate hogs. Six sets of instruments owned by the Dothan Rotary club were supplied to the demonstrators and a serum-distributing point was established in charge of a reliable veterinarian. More than 9,000 head of hogs were treated. In many cases it was found that sickness, other than cholera, was due to some incidental cause, such as bad peanut meal, and balanced rations were advised. The county agent's work resulted in 32 farmers establishing pastures to keep their hogs off the open range, the land thus pastured being freed from many noxious weeds by the rooting of the animals, and prepared for future cultivation. Forty-four farmers in the county were interested in stump removing, and about 2,000 acres of land was cleared in this movement. About five tons of dynamite was bought for the purpose largely on the co-operative plan.

FEEDING GARBAGE TO SWINE

Practical Means of Producing Pork, According to Department of Agriculture Bulletin.

When properly managed, the feeding of garbage to swine is a practical means of pork production, according to Farmers' Bulletin 1133 issued by the United States Department of Agriculture.

In addition it helps to settle a problem which confronts many cities and towns—that of effective and economical garbage disposal. The wholesomeness of garbage depends greatly on the care it receives in households. Tin cans, glass, paper, oyster shells, sawdust, soap, and other foreign materials when mixed with garbage may cause numerous losses of hogs. But it has been found that this evil can be minimized by proper precaution and published requests to householders to be careful.

Immunizing of hogs is necessary to prevent hog cholera and frequent collection is urged to keep the feed fresh. Copies of the bulletin may be had free by applying to the United States Department of Agriculture.

SEGREGATE ALL NEW ANIMALS

Wise Plan to Place Recent Purchases in Quarantine for at Least Twenty-One Days.

The proper and only safe thing to do with the recently purchased animal is to place it in quarantine upon its arrival. Better keep it there not less than 21 days at least. This enables you to keep a careful watch over the animal at all times, and to determine that the animal is healthy, and in case there should be any disease, it would not be carried to those animals already on the farm.

SUPPLY PIGS PLENTY WATER

Young Porks Drink Often and in Small Quantities—Non-Freezer is Very Useful.

A pig likes to drink water often and in small quantities. It drinks water the same as it eats feed—a little at a time and often. That is why a non-freezing waterer and a self-feeder for grain are so very valuable in the hog lot.

TRAILS ABOUND IN ROMANCE LOVE SEEN IN NEW LIGHT

Written Testimonial of the Trials and Triumphs of the Men Who Fashioned Them.

Old Idea of Affection All Wrong, According to Pronouncements of Modern Scientists.

Nothing is more romantic than the trail, remarks a writer in the Los Angeles Times. It is the artery of trade and life itself. On land it moves about the bases of the mountains, out of the lowlands, winding through the chaparral, along the easy grades of the canyons, never forcing its way, but definitely avoiding the slippery rock face and the poison oak; upward into the fresh air that breathes through the pass; on, through the pass and into the unknown beyond, into the valley of heart's desire it carries the laden mule and the traveler with his pack.

Across the great deserts the trail is a caravan route, seeking the shades of cliff and avoiding the shifting dunes; stretching unerringly toward the next water hole. It is the written testimonial of the trails and triumphs of the men who have gone before. It is the only pathway of the devout pilgrim, as of the warlike Bedouin. Every habitation of man that has ever dominated one of these great trails has made history and has been in its day a treasure house.

Horrible Death.
"How does a hairdresser end his days?"
"He curls up and dies."

Eccentricities can be borne if people are not vain of them and always boasting about them.

There is nothing so thoroughly misunderstood as perfection.

The Sweetness of Wheat and Malted Barley is the sweetness of

Grape-Nuts

The delicately rich flavor, natural to the grains, is developed through 20 hours baking. Grape-Nuts needs no added sugar, and is rich in nourishment of a form easy to digest.
